# HOW IT WORKS?

Ecobike e-bikes are supported by efficient and reliable electric motors. Depending on the model, motors are located in either rear or front wheel hub, or centrally (mid-drive motors).

The drive system is powered by a lithium-ion battery located in the frame or on the trunk.

Intuitive displays are used to control the driving assistance. They also provide users with different additional function which vary from one model to another.

SCHEME OF A TYPICAL E-BICYCLE WITH MID-DRIVE MOTOR AND BATTERY IN FRAME

## Good to know

### Bike weight (kg)

Total weight of the bike including all components, engine and battery. Our frames are made using light aluminium alloys, which translates into their relatively low weight

### Torque

The torque of an electric motor determines its capabilities in relation to the terrain's features. It is responsible for acceleration, the bike's pulling power, and making it easier to climb hills

### Motor-assisted driving

The engine starts automatically in response to the movement of the bicycle crank and stops if the sensors do not detect pedaling by the user

### Battery capacity (Wh)

This value is expressed in Watt-hours for the bike range that can be covered using a fully charged battery

### Maximum range (km)

Maximum route length can be traveled on single battery charge. The distance depends on the rider's weight, terrain and the level of driving assistance

### Classic driving

Every Ecobike model is also a well-equipped bike. You can use an e-bike in a standard way with the motor turned off. It does not differ from a traditional bike ride

# MTB MOUNTAIN E-BIKES

Here the real adventure begins!  
Whenever the asphalt ends and the  
road becomes unpredictable, there is no  
room for experiments. You need a bike  
you can rely on. Meet our excellent  
mountain e-bikes with powerful  
rear-mounted and mid-drive motors.

#READY  
TO  
ECO

# — CITY

Feel free in the urban jungle.  
Avoid traffic jams and get  
to wherever you want - quickly!

Start saving real money on fuel and  
car insurance. Never worry about  
a parking space again. And most  
of all, care about your environment.

# CELEBRATING 15 YEARS TOGETHER!

Ecobike is one of the first e-bike manufacturers in Europe. We have a wide experience in electric bikes manufacturing. Our e-bikes are sold both under our own brand Ecobike and other well-established European brands. We have gained trust across the entire European continent.

We recently established a state-of-the-art warehouse in the heart of Wrocław, a city renowned as Poland's IT and automotive Silicon Valley. Our Ecobike headquarters are much more than a modern factory and warehouse with specialized services - it's also a hub for innovation, where we create and test prototype solutions that advance the whole e-bicycle industry.

## GROWING NETWORK OF 300+ DEALERS

## What makes Ecobike special?

### CRAFTED IN EU

Our bicycles are crafted with care in Poland, using only world-class components. Ecobike Team draws on years of experience to assemble each e-bike with precision and attention to detail.

### BEST SERVICE EVER

Professional service is key to keeping your bike in optimal condition. Ecobike provides top-notch repair services to keep your bike running smoothly.

### THE PERFECT CHOICE

Ecobike e-bikes have an ideal price to quality ratio. The sleek and modern design of our e-bikes also make them a stylish option for riders of all ages.

# PROVEN

Bikes are all about the equipment. Ecobike e-bikes combine reliable parts from recognized manufacturers with durable electric motors and long-lasting batteries.

Our e-bikes work in every situation. Travelling through Europe and Asia? Or maybe 14,000 kilometers around the world? Our customers have already proved it!

# TO WIN

We have won numerous awards during prestigious bike fairs. Our e-bikes have been recognized worldwide, earning the highest ratings in customer reviews and tests.

CE

All products are manufactured in accordance to EU regulations and restrictive standards EN15194 / EPAC / ISO4210-2
